

# LOVE: DRAMA

## Curriculum for Excellence Workshops

### Science: | Planet Earth | Biodiversity and Interdependence 2

#### Content

##### Will I grow?

Become a botanist at the Botanical Gardens, and you will observe and learn about the many plants that live and thrive on planet Earth. What factors affect a plant's growth? What does their interaction with humans do for their survival and can the plants fight back? Pupils will use immersive improvisation techniques to examine and present their knowledge of the plant kingdom.

#### Learning Level

Suitable for early, first and second stages with information and delivery adapted to the needs of your class.

#### Space

A large clear space, most suitable would be either a gym or assembly hall.

#### Time

Early/First – 60 minutes

Second – 90 minutes

#### Additional Information

As with all of our workshops it is extremely important the class teacher stays with the group at all times. This ensures that the learning experiences and outcomes are shared and that our workshops contribute effectively to the development of each and every young person.

Love Drama prides itself on creating a bespoke service that meets the needs of its clients. Love Drama is flexible and responsive to individual requests and the dissemination of all workshops can be tailored to complement the outcomes and experiences you have included in your forward planning. You may choose to work with us in a one-off session, over four weeks or for the duration of a term, in order to create a learning experience that effectively supports all participants. If you have any queries regarding participation within these workshops, please do not hesitate to contact us.
