

LOVE DRAMA

Curriculum for Excellence Workshops

Science: | Planet Earth | Energy Sources and Sustainability

Content

Energise Me

By exploring and harnessing the way in which energy is created, transferred and lost, the pupils will build time machines that will transport them into the future. However, the future is bleak and our main energy source is almost gone. We are trapped in the future unless they can find a solution to the depleted energy resources. The pupils will adopt role playing techniques, whilst exploring their knowledge of energy and its properties in their everyday lives, in order to tackle problem solving activities.

Learning Level

Suitable for early, first and second stages with information and delivery adapted to the needs of your class.

Space

A large clear space, most suitable would be either a gym or assembly hall.

Time

Early/First – 60 minutes

Second – 90 minutes

Additional Information

As with all of our workshops it is extremely important the class teacher stays with the group at all times. This ensures that the learning experiences and outcomes are shared and that our workshops contribute effectively to the development of each and every young person.

Love Drama prides itself on creating a bespoke service that meets the needs of its clients. Love Drama is flexible and responsive to individual requests and the dissemination of all workshops can be tailored to complement the outcomes and experiences you have included in your forward planning. You may choose to work with us in a one-off session, over four weeks or for the duration of a term, in order to create a learning experience that effectively supports all participants. If you have any queries regarding participation within these workshops, please do not hesitate to contact us.
