

# LOVE DRAMA

## Curriculum for Excellence Workshops

Science: |Forces, Electricity and Waves|Forces

### Content

Machines, Machines, Machines

Let's all go to the chocolate factory!!! However, it's little fun when the magical machines stop working and the chocolate stops flowing. The pupils are invited to the chocolate factory to solve the problems of their clunky old machines. Exploring their knowledge of forces the pupils will have to work hard to fix the many machines that lie in disrepair. Working collaboratively the children will use physical and vocal skills to make machines and soundscapes in order to repair the chocolate factory.

### Learning Level

Suitable for early and first stages with information and delivery adapted to the needs of your class.

### Space

A large clear space, most suitable would be either a gym or assembly hall.

### Time

Early/First – 60 minutes

Second – 90 minutes

### Additional Information

As with all of our workshops it is extremely important the class teacher stays with the group at all times. This ensures that the learning experiences and outcomes are shared and that our workshops contribute effectively to the development of each and every young person.

Love Drama prides itself on creating a bespoke service that meets the needs of its clients. Love Drama is flexible and responsive to individual requests and the dissemination of all workshops can be tailored to complement the outcomes and experiences you have included in your forward planning. You may choose to work with us in a one-off session, over four weeks or for the duration of a term, in order to create a learning experience that effectively supports all participants. If you have any queries regarding participation within these workshops, please do not hesitate to contact us.
