

LOVE: DRAMA

Curriculum for Excellence Workshops

Science: | Biological Systems | Inheritance

Content

Generations

The pupils will discover the similarities and differences that make us all unique. Can we match the family members in order to explore the physical characteristics that we inherit from our parents, grandparents and beyond? We will also look at the life cycles of plants and animals in order to understand where we all come from. The pupils will play imaginative problem solving games, which will enhance their skills in evaluating evidence using life cycles and inherited characteristics.

Learning Level

Suitable for early, first and second stages with information and delivery adapted to the needs of your class.

Space

A large clear space, most suitable would be either a gym or assembly hall.

Time

Early/First – 60 minutes

Second – 90 minutes

Additional Information

As with all of our workshops it is extremely important the class teacher stays with the group at all times. This ensures that the learning experiences and outcomes are shared and that our workshops contribute effectively to the development of each and every young person.

Love Drama prides itself on creating a bespoke service that meets the needs of its clients. Love Drama is flexible and responsive to individual requests and the dissemination of all workshops can be tailored to complement the outcomes and experiences you have included in your forward planning. You may choose to work with us in a one-off session, over four weeks or for the duration of a term, in order to create a learning experience that effectively supports all participants. If you have any queries regarding participation within these workshops, please do not hesitate to contact us.
