

LOVE DRAMA

Curriculum for Excellence Workshops

Science: | Planet Earth | Processes of the planet

Content

Ryan the Raindrop

Pupils will meet Ryan the Raindrop on his journey through life, learning how he changes as he moves around the world. Along the way we will meet some friends who help us explore the molecules that make up our world. By using imaginative play the pupils will explore the water cycle and properties of solids, liquids and gases by standing on clouds, soaring through the sky and swimming in oceans before returning home for a big drink of H₂O.

Learning Level

Suitable for early, first and second stages with information and delivery adapted to the needs of your class.

Space

A large clear space, most suitable would be either a gym or assembly hall.

Time

Early/First – 60 minutes

Second – 90 minutes

Additional Information

As with all of our workshops it is extremely important the class teacher stays with the group at all times. This ensures that the learning experiences and outcomes are shared and that our workshops contribute effectively to the development of each and every young person.

Love Drama prides itself on creating a bespoke service that meets the needs of its clients. Love Drama is flexible and responsive to individual requests and the dissemination of all workshops can be tailored to complement the outcomes and experiences you have included in your forward planning. You may choose to work with us in a one-off session, over four weeks or for the duration of a term, in order to create a learning experience that effectively supports all participants. If you have any queries regarding participation within these workshops, please do not hesitate to contact us.
