

# LOVE DRAMA

## Curriculum for Excellence Workshops

### Science: | Planet Earth | Space

#### Content

Is there anybody out there?

Pupils will explore the universe, journeying from planet Earth through the solar system and beyond to find out what it's like to be an astronaut. Venturing out in the hope of seeking new life and learning more about our place in the universe, the pupils will be able to follow in the footsteps of Galileo and Stephen Hawking. By using simple physical demonstrations the pupils will be able to describe and discuss the vast array of objects, both living and non-living, that exist in the universe.

#### Learning Level

Suitable for early, first and second stages with information and delivery adapted to the needs of your class.

#### Space

A large clear space, most suitable would be either a gym or assembly hall.

#### Time

Early/First – 60 minutes

Second – 90 minutes

#### Additional Information

As with all of our workshops it is extremely important the class teacher stays with the group at all times. This ensures that the learning experiences and outcomes are shared and that our workshops contribute effectively to the development of each and every young person.

Love Drama prides itself on creating a bespoke service that meets the needs of its clients. Love Drama is flexible and responsive to individual requests and the dissemination of all workshops can be tailored to complement the outcomes and experiences you have included in your forward planning. You may choose to work with us in a one-off session, over four weeks or for the duration of a term, in order to create a learning experience that effectively supports all participants. If you have any queries regarding participation within these workshops, please do not hesitate to contact us.
